RE: Modification request for new Dike construction for the North End of the Primary Pond, Reilly Wendover, Bonneville, Tooele County, Utah, State Potash Lease ML-18962, T1S, R17W, Section 32, (DOGM # M/045/002)

Dear Mr. Wadsworth:

The School and Institutional Trust Lands Administration (SITLA) is in receipt of a copy of your letter, dated October 16, 1995, to the Bureau of Land Management requesting approval for construction of a new dike at the north end of Pond System V. I am sure you are now aware that any amendments to the Reilly plan of operation which affects State land must be approved by SITLA. In the future could you also copy SITLA with any amendment to your plan of operation.

After consultation with the Mr. Douglas Koza of the BLM and Mr. Tom Munson of the Division of Oil, Gas and Mining, the School and Institutional Trust Lands Administration is satisfied that your request for construction of the new dike complies with applicable regulations and requirements. SITLA hereby grants approval for construction of the new dike on the above referenced State land.

As you know the Bureau of Land Management and SITLA are in the process of reviewing reclamation bonding for the entire Reilly Wendover operation. A request for bonding of disturbances created by your operations on State will be sent under separate cover.

Please contact me if you have any questions.

Sincerely,

William M. Stokes  
Mineral Resources Specialist

cc: Stan Perks - BLM  
Tom Munson - DOGM
